-

PROFESSIONAL EXPERIENCE

Austrian Airlines (Lufthansa Group)

August 2024 - Present

Strategic Fullstack Developer

- Built both frontend and backend from scratch for multiple projects using various technologies, such as Angular and Flutter for frontend and .NET and Python for backend.
- Worked on a large scale .NET API alongside a team of experienced backend developers.
- Regularly reviewed other colleagues work and actively participated in discussions about new features and projects.
- Helped younger colleagues and interns with their tasks and gave them helpful directions.

CAKE.com (Clockify)

June 2023 - August 2024

Angular Frontend Developer

- Worked on maintaining the codebase and adding new features using Angular and Typescript.
- Wrote custom SCSS and HTML code in order to enhance the application UI and accessibility.
- Utilized GitLab for version control and code repository management.
- Handled installing and maintaining of dependencies and packages using NPM.
- Actively participated in discussions about potential future features and implementations.

YouTestMe

Sep 2021 - Dec 2022

Frontend Developer

- Contributed to designing and implementing new features for both the application and the website.
 - Regularly used HTML and CSS to improve UI and resolve bugs on the front-end.
 - Gained valuable experience in agile development methodologies and demonstrated effective teamwork.
-
